

Our NM Pedestal has a wide range of features such as the noise-reducing rubber head, the Adjustment Key, a wide range of adjustable heights and the pre-cut base for wall corner cuts, make the NM pedestal perfect for any kind of raised flooring applications. Featuring an above average loading capacity and a reliability that can only be offered by experts in the field of raised flooring supports, the NM pedestal is regularly selected and widely appreciated Internationally within the building industry. When installed on a slopping surface, shims or the slope compensator can be placed on the pedestal head to ensure a level support surface. The slope compensator can add up to 1% of slope.

Specifications

SELF-LEVELING HEAD

FEATURES

- Bi-Material Head Offers Anti-Noise & Anti-Slip
- Adjustable Heights
- Made from 100% Recycled Material
- Removable Spacer Tabs
- Smooth Base with Pre-Cut Lines
- Resistant to Weathering, Acids, UV Rays and Wear & Tear
- Resistant to Temperatures Ranging from -40F - 248F

DIMENSIONS

Base Diameter	8"
Head Diameter	6"
Tab Height	1/2"
Tab Width	5/32"
Load Capacity	3,300 lbs.
Height Range*	1" - 1.57" * Higher with Extensions

ADJUSTMENT KEY

NM - ADJUSTABLE PEDESTAL

Specifications

Pedestals

OPTIONS

- Slope Compensator to Level Final Grade
- Shims to Level Final Grade
- Height can be Added to any Pedestal with the Use of the NM Extension

LIGHT PAVERS

Light pavers require the use of our self-leveling head with locking fixed piece. This allows the head to be fixed, as the self-leveling head is not recommended due to the light weight of the tile. Installing our IPE wood deck tiles also require our four pins that allow the tile to lock into the head. Our EH fixed supports are also available for heights less than 1.125".

HEAVY PAVERS

Concrete or porcelain pavers should be installed using exclusive self-leveling, bi-component head that allows automatic compensation of the imperfections and the slope of the substrate. Our EH fixed supports are also available for heights less than 1.125".

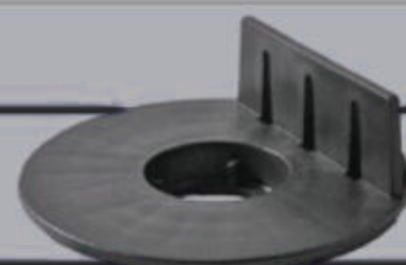

ALUMINUM JOISTS

Aluminum joists are an option as a substrate for an elevated system. Our special aluminum joist head locks the aluminum joist to the head. Aluminum tabs anchor the decking in a simple and reliable way for the installer. Can be used with wood and ceramic decking applications.

WOOD JOISTS & PLANKS

Our pedestal supports can be used for all types of substructure joists including wood joists. For this application our standard SE support is used with our exclusive self-leveling wood joist head that is supplied with screw slots to secure the wood joist to our head.
